

Meeting note: The call-in number is (605) 313-5692 and 7857820 is the access code.

TOWN OF DRESDEN

Hulett's Landing Sewer District #1 Committee Meeting

4/13/26 meeting has been cancelled; this is a courtesy update memo

If you have any questions please contact the Board member for SD#1, Allen Wilbur at awilb@verizon.net and the committee will get back to you

Sewer General

1. Sewer Superintendent Contract & job description

Fortunately Dillon Priest has agreed to cover the gap in the superintendent role until we are able to have it filled.

Unfortunately with the governance disruption we are unable to sign contracts until we get a town supervisor in place.

As soon as the Town Board is reconstituted we will aggressively pursue a new superintendent for the district.

Please let anyone you know who might be interested to submit a resume to the sewer committee.

Work for sewer district #1 is at \$15,000 a year, approximately 3 hours week of work, and an hour a month to file reports with the DEC. Sewer District #2 work is currently hourly.

Other work is to be on-call for sewer emergencies and to enforce the sewer law.

2. Sewer maintenance update – any maintenance/issues to report

Dillon reports that there are no issues currently with the system.

3. Expenses – anything atypical

Unfortunately with the governance disruption we are unable to repay individually filed invoices at this time.

Upcoming atypical expenses anticipated are: a connection cord for the generator to the control panels, a trailer for the generator, lawyer fees for the RFQ, lawyer fees for the temporary work authorizations to clear the trees along the ridgeline tanks of SD#1 outfall #1 along the first fairway, the clearing of the trees along the first fairway ridgeline, the pumping out of the ridgeline tanks, the physical inspection of the ridgeline tanks by someone who is confined-spaces certified. The intent is to keep the ridgeline cleared so we don't have to deal with tree overgrowth in the future.

4. National Grid Bills – meter at Albert & CR 6

?

Meeting note: The call-in number is (605) 313-5692 and 7857820 is the access code.

5. Sewer Lateral Applications – anything impacting SD#1

None

6. Sewer District #1 budget codes

This one is delayed until we have a new town supervisor

Sewer District #1 Engineering Study

1. Project update

The Engineering Facilities Corporation has agreed to give us an extension in order to get additional invoices to file against the grant. This should enable us to recoup a broader swath of our expenses.

Sewer District #1 Sewer Line Burial Project

1. Project update

Cleanup will be in the late spring. Homeowners will be notified.

Parking lot items

- Pump-outs of each outfall will occur in the spring after the snowcover is gone
- Monitoring wells – resume program in spring 2026
- Sentry system for pumping stations – ideally would be factored in next budgeting cycle/
Estimate from LaPlante about adding cell notification to pump stations
- Law overhaul to replace SD#1 standalone law and implement an umbrella law to cover all sewer districts within Dresden; Overarching law to cover both districts, allows for uniqueness of both districts
- Proportional billing / flow meters for SD#1– topic is continually open for public comment. All ideas are considered.
